

## Key Stage 1 Curriculum Topic Overview 2024 -2025

The majority of our National Curriculum subjects are taught through a thematic and engaging cross-curricular approach. Each theme takes a main subject to drive the learning forward and our enquiry-based approach provides our pupils with the opportunity to learn collaboratively, independently, innovatively and develop higher order thinking skills.

Year Group	Term 1	Term 1	Term 1	Term 2	Term 2	Term 3	Term 3
1	'All about me'	'Helping Hands'	'Changes'	'Whatever the Weather'	'Food Glorious Food'	'Let's Investigate'	'Time Traveller'
2	'This Is Me!'	'We Could Be Heroes'	'What a Wonderful World'	'Once Upon a Time'	'Material World'	'Up, Up and Away'	'Healthy Me'

As all our topics are **enquiry led**, they will start with a '**Hook**' which is an initial stimulus or experience designed to help the children connect with the content and skills that will be taught. At the end of the theme's learning journey, the children will celebrate their achievements with a final '**Outcome**' that can be shared with each other, parents or the school community.

Topic Main Subject Focus:			Year Group Introductory Topic
	Science Topic		World History Topic
	Geography Topic		Local Humanities Topic
